

FENRIR

BRAND ASSETS & DESIGN SYSTEM

Product Requirement Document (PRD) Reference Manual
Online Gaming Platform Specifications

PROJECT SPECIFICS:

Author: Himanshu Kumar
Project Version: 1.0.0 (Production-Ready)
Date: June 15, 2026
Target Base: Web & Responsive Mobile

1. Brand Identity & Logo Ideas

The Fenrir brand is named after the legendary Norse wolf, symbolizing power, speed, and raw energy. This branding is integrated directly into the portal's design system using sharp angles, neon lighting cues, and a modern cyber-industrial aesthetic. It represents a fast, competitive, and high-fidelity environment where players can easily match, play, and win.

Logo Design Concepts

Concept A: The Cyber Wolf Silhouette (Selected Identity)

A geometric logo depicting a wolf head constructed out of clean, sharp cyan lines on a dark gray background shield. The wolf's eye features a small purple neon dot. This logo scales exceptionally well, from a tiny favicon in browser tabs to large banners on main landing screens.

Concept B: The Esports Shield Badge

An angular shield outline containing a stylized 'F' combined with sharp canine claw marks. The color scheme transitions from electric blue to warm gold. This is used specifically for tournament trophies and leaderboard rank icons.

Concept C: The Fenrir Slash Wordmark

Custom heavy-weight sans-serif typography representing the word 'FENRIR'. A digital glitch or claw scratch mark cuts horizontally through the letters, emphasizing action and competitive edge.

2. Color Palette & Typography

Visual Color Palette (Design Tokens)

	Deep Space Gray (#12131A)	Primary website dark background, panels, and borders
	Electric Neon Cyan (#00E5FF)	Primary brand color, highlight states, glowing edges
	Cybernetic Purple (#7B2CBF)	Secondary brand color, premium tiers, headers, and badges
	Pure Silver White (#E2E8F0)	Primary typography color, high contrast labels
	Status Green (#00F5D4)	System success states, player online lights, active lobbies
	Warning Gold (#FFB703)	System alert messages, currency points, and elite rank rings

Typography & Font Hierarchies

To establish a premium esports feel, Fenrir utilizes a clear font pairing:

- Primary Font: Outfit (A clean modern sans-serif geometric font used for all titles and headers).
- Secondary Font: Inter (An optimized readability sans-serif font for descriptive text, rules, and user bios).
- Monospaced Font: Roboto Mono (Used for numerical counts, lobby pings, statistics, and leaderboards).

Typography Scaling Guidelines:

- Page Titles (H1): 32px Bold | Line Height 40px | Letter Spacing -0.02em
- Section Headers (H2): 20px Semi-Bold | Line Height 28px | Letter Spacing 0em
- Sub-sections (H3): 14px Medium | Line Height 20px | Letter Spacing 0.05em
- Body Copy: 12px Regular | Line Height 18px
- Mini Badges / Metadata: 9px Bold | Uppercase | Letter Spacing 0.1em

3. UI Wireframes & Layout Structures

The layout of Fenrir is built on a modular grid system designed for flexible adjustments. It consists of a persistent left-hand navigation sidebar, a quick stats topbar, and a dynamic central workspace panel that loads content panels seamlessly without resetting the main audio or WebSocket states.

Screen A: Main Dashboard Layout

- Sidebar (Width 240px): Logo placeholder at top, list of icons (Dashboard, Game Lobby, Tournaments, Profile, Store, Settings, Support).
- Top Header: Search bar (center-left), profile badge with status, level indicators, and wallet coin counts (right).
- Main Section: Carousel banner showcasing currently featured tournament. Grid cards detailing available game genres. Right column lists active lobbies and esports streaming matches.

Screen B: Multiplayer Matchmaking Lobby

- Main Center Card: Game title banner, list of players in the lobby (showing avatars, usernames, current ready status). Buttons to 'Ready Up' or 'Start Game' (host only).
- Right Sidebar: In-game chat room. Includes text input, scrollable chat logs, and emoji selectors.
- Matchmaker Panel: Sliding overlays showing estimated queue time and finding-match indicators.

Screen C: Tournament Brackets Module

- Header Banner: Title, game logo, active prize pool, rules summary, and coordinator contacts.
- Bracket Visualizer: Multi-column canvas rendering matches from Round of 16 down to the Finals. Lines link nodes indicating progression. Clicking any node expands match stats and live stream links.

4. UI References & High-Fidelity Mockup

Below is a high-fidelity visual mockup of the Fenrir platform. This represents the core dark theme, neon
